DETAILED ACTION

Drawings

The drawings are objected to because Figure 8 shows two separate elements therein.

Thus, it is unclear whether these elements are intended to be depicted as being assembled together. If this is the intention, then assembling lines or at least a bracket should be placed in the figure. *Otherwise*, the figure should be corrected to overcome this objection.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 1 and 5 are objected to because of the following informalities:

In line 17 of claim 1, it appears that "hold" should be changed to --holding--.

In line 55 of claim 1, it is suggested that "connected" be changed to --connect--.

In line 56 of claim 1, it is suggested that --be-- be inserted before "stably".

In line 9 of claim 5, "30" should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of the phrase "may be" in line 31 of claim 1 renders the claim indefinite since what "may be" to one "may not be" to another". *Thus*, the metes and bounds of the claim cannot be properly ascertained since one would know whether the limitation proceeding "may be" in the claim is being *positively* required as part of the claim.

Claim 1 recites the limitation "said internal inclined surfaces" in lines 45-46. There is insufficient antecedent basis for this limitation in the claim. It is noted that "internal walls" and "inward inclined surfaces" have been set forth in lines 36 and 37, respectively.

The language of the recitations "inward stamped", "front side" and "rear side" of claim 4 renders the claim indefinite since the structural relationship and orientation between the elements is unclear.

The terms "long" in claim 5 (see lines 3 and 10) and "close" in claim 6 (see last line) are relative terms which render the claims indefinite. The terms "long" and "close" are not defined by the claims, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action, claims 2, 3, and 7 are objected to as being dependent upon a rejected base claim, and claims 4-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office.
